On the <u>detailed event</u> screen allow users to share the event through a Twitter status update.

- The user interface should contain a text field for the tweet and a button to share it.
- The placeholder attribute of the text field should contain the name of the event.
- If the tweet has been published successfully the user interface should give feedback to the user by confirming the tweet has been published. This confirmation should contain the content of the original tweet.
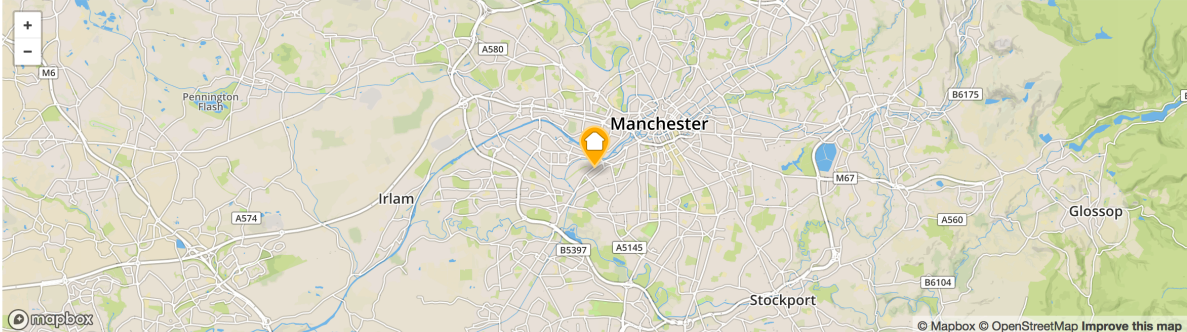

a) Before tweeting

b) After tweeting

Football match

⚡ Event	📍 Venue	📅 Date
